

WMT

MULTI-TOOLS

DEMOLITION

NEW

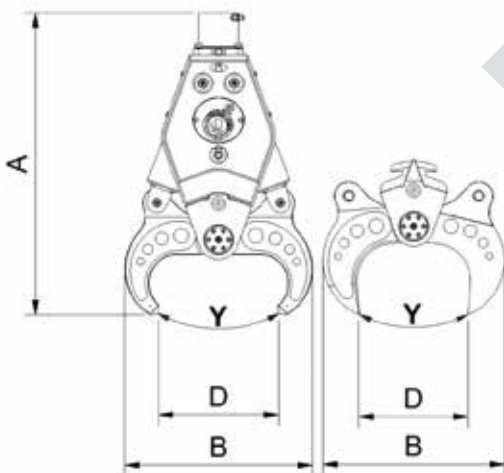

The **WMT Multi-Tools** is a tool holder very compact and light, equipped with a **quick change jaws system**, developed for **primary, secondary and selective demolition** in industrial or civil environment.

The reduced weight combined with outstanding power, innovative design and **the crusher and shears kit**, will define the WMT the ideal tool to crush reinforced concrete, iron and steel structure, cut copper cable with big diameter very quick, precise and guaranteeing the maximum security of the operators.

The designed solution found by Wreko engineer is a versatile and very effective tool, an allied decommissioning professional can seriously count on.

- Changing of jaws in 10 minutes with quick change system
- Teeth profile maximise crushing force, penetrating and destroying concrete easily than before.
- 2 models for excavator from 3 to 15 ton
- Hydraulic rotation 360, compact and very reliable.

		WMT 5	WMT 10
Excavator	tons	2 - 5	6 - 15
A	mm	1100	1500
B	mm	650	900
D	mm	420	670
Y	ton	25	35
Weight	Kg	300	700
Oil	l/min	30 / 50	70 / 110
Pressure Oil	bar	250	300
Rotation	°	360	360
Oil	l/min	5 / 8	5 / 8
Pressure Oil Rotation	bar	180	180
