MOWING BUCKET

WMBE

MOWING BUCKET

FORESTRY

The **Mowing Bucket WMBE** can be used on excavator for cutting grass, reeds and similar environment near to the river, water or fluvial bed.

The working principle is characterized by a central gear transmission in oil bath, driven by an orbital motor reliable and efficient, completely protected by the frame.

- Reliable and safe oscillating frame, with leaf spring
- Reinforced blade teeth
- Game recovery system on the bar mower
- Extremely solid, built with special high-strength steels and anti-wear
- Low hydraulic power needed for working
- 3 models from 12 to 30 ton excavator
