# LOG GRAPPLE

MODEL		WFG10	WFG15
Excavator	ton	7 - 18	14 - 20
Weight	kg	255	570
A	mm	1600	2060
B	mm	900	1160
C	mm	440	550
Capacity	m <sup>2</sup>	0,26	0,48
Oil Flow	l/min	50	50
Work pressure	bar	200	250

The indicated weights are to be considered approximate and refer to the equipment in its standard fixed configuration.

The WFG **Log Grapple** is the ideal solution for **handling and loading timber, branches, and processing waste, as well as for feeding wood chippers.** The range includes **two heavy-duty models**, specifically designed for **excavators from 8 to 18 tons.**

These forestry attachments are engineered to deliver an exceptional grip: the carefully optimized geometry, combined with high clamping force, ensures efficient log compaction—meaning more wood moved in less time.

The log grapples can be equipped with the **Supersaw®** by Hultdins, turning the grapple into a fully functional felling tool capable of cutting logs and brush quickly, safely, and with maximum control.

Available with **closed tines or open tips** and a variety of hydraulic rotation systems, the WFG adapts to any operational need—proving itself to be a tough, reliable, and truly indispensable tool in any forestry environment.
