MOWING BUCKET

The WMB Flail **Mowing Bucket** is a specialized attachment designed for **agricultural, forestry and land maintenance applications**. Developed for land reclamation authorities, agricultural contractors and forestry companies, it is ideal for cutting grass, shrubs, reeds and light vegetation along riverbanks, ditches, uncultivated land and roadsides, helping to keep canals and waterways clear while ensuring the proper flow of irrigation water.

The front-mounted cutting system, combined with the wide-mesh grid, allows **mowing operations even underwater**, cutting and collecting grass and reeds simultaneously directly inside the bucket.

The new Radura-style teeth and reinforced serrated blades ensure a cleaner, more effective cut, even through the toughest vegetation. They also provide greater wear resistance, longer service life, and excellent cutting performance in the most demanding applications. The central oil-bath gear transmission, driven by a hydraulic orbital motor fully protected within the frame, ensures maximum reliability and continuous operation under heavy-duty working conditions. The oscillating kit with leaf spring keeps the bucket in constant contact with the ground, absorbing impacts, protecting the attachment from excessive stress and ensuring consistent cutting quality.

MODEL		WMB1600	WMB2000	WMB2500	WMB3000
Excavator	ton	5 - 12	12 - 25	12 - 30	12 - 30
Weight	kg	250	290	360	450
A	mm	1544	1930	2420	2900
B	mm	800	800	800	800
C	mm	900	900	900	900
D	mm	750	750	750	750
E	mm	600	600	600	600
F	mm	800	800	800	800
Oil Flow	l/min	20/30	20/30	20/30	20/30
Work pressure	bar	120/140	120/140	120/140	120/140

The indicated weights are to be considered approximate and refer to the equipment in its standard fixed configuration.
